

UNIVERSITY OF GOTHENBURG

Department of Environmental Hygiene
August 17, 1982

Dr Domingo M Aviado
225 Harsthorn Drive
Short Hills, New Jersey 07078
USA

In view of the continuing public interest in environmental tobacco smoke and its purported health effects, the department of Environmental Hygiene at the Medical Faculty of the University of Gothenburg, Sweden and the Division of Environmental Medicine at the Institute of Social and Preventive Medicine, Geneva University, are organizing a workshop with the title "Environmental Tobacco Smoke Effects with Particular Reference to Exposure Levels". A description of the objectives of the workshop as well as a draft agenda are enclosed.

Because of your interest in this area, you are invited to participate in the workshop which will take place in Geneva, March 15-17, 1983. The organizing committee will provide travel and board/lodging costs for the meeting through a grant made available to the Geneva University from the Tobacco Institute. It is intended to publish the proceedings of the workshop as a supplement to the European Journal of Respiratory Disease.

Please let me have your acceptance to participate in the work shop, as well as the title of your contribution, not later than October 1, 1982. A list of invited participants is enclosed. Any suggestions concerning the workshop, its format and additional participants will be most welcome.

Yours sincerely

Ragnar Rylander, M.D.
Professor of Environmental Hygiene
